ATCA shelfs air filter cleaning every 3 months;

Shelf monitoring can be done via http using the shelf manager ip;

Shelf manager of the acquisition ATCA shelf has the ip 192.168.1.142;

Shelf manager of the real time ATCA shelf has the ip 192.168.1.144;

FTP server ip for updates is the 192.168.1.150 (login anonymous, no password, files path /);

Both shelf managers are running the same software version (63998-08175) and updated on November 9 of 2017;

Both shelfs have been updated on November 9 of 2017.

For the update procedure is needed a serial to rj45 cable connected between a PC and the SAP rj45 port 1 (please request cable to Antonio Batista ext.3113);

Future updates, if any, and related documentation can be retrieved from:
