

Please fill the following sub-sections according to the format shown and the examples provided.

It is suggested that for each section you start by copying as many items as required.

A tentative list of the papers published in 2011 by IPFN members can be found in <http://metis.ipfn.ist.utl.pt:8085/re....php?year=2011>.

The list is the result of querying the ISE Web of Knowledge database and is certainly incomplete or containing wrong entries.

General recommendations:

Authors: always use the following format:

Surname1 N, M Surname2, (...) and L SurnameN

Example: Abel IG, BN Breizman, and SE Sharapov

Journal names: use the full journal name, not any abbreviations: e.g. “Journal of Applied Physics” not “J. Apply Phys.”

Paper, talk titles: Do Not Capitalize The Initials Of Every Word

References: Do not include any unnecessary information for papers (e.g. doi, arxiv codes) unless they are strictly needed as a reference.

Please note that the papers must be published, not only accepted, submitted, or any other incomplete form.

Do not use italic, bold or underlined except if specifically requested.
